

Bollard Vent Filter

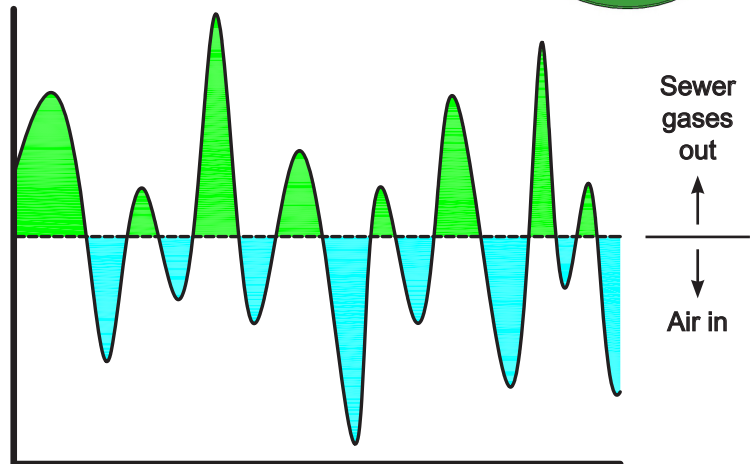

Patent Pending

www.ManholeOdorEliminator.com

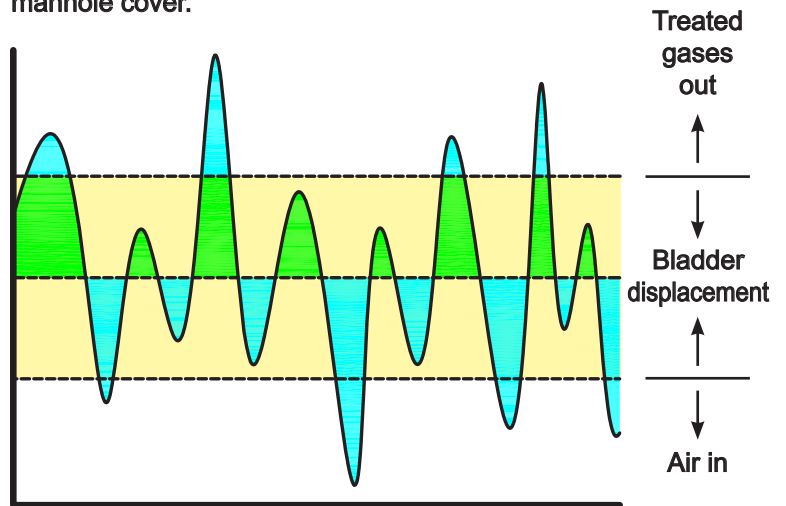

- Controls Odors
- Low Cost
- Contains odor absorbent carbon
- Easy Installation
- Long Lasting
- Replaceable Cartridge
- Low Maintenance

The bladder buffers the frequent fluctuations of sewer gas. The odor absorbent carbon only has to treat the peak flow rates.

Typical gas and air flow through bollard vent or manhole cover.

Only sewer gases that exceed bladder capacity need to be treated. This greatly extends carbon life.

The manhole odor eliminator is a carbon filter system designed to remove odors from sewer vents and other manholes. Each filter cartridge contains odor absorbent activated carbon. This filter can remove large amounts of hydrogen sulfide and other odors from sewer manholes. Call today for sizing and information.
